of Medical Sciences

The John Evans Professorship Endowed Tuition Assistance Scholarship was established to help support the professional development of two students enrolled in the master's program in Biomedical Imaging who have a financial need and to support diversity and inclusion in the field of Radiology/STEM as a path to reducing healthcare disparities.

Each applicant's qualifications will be considered on an individual basis. Scholarships will be awarded to a maximum of two students from traditionally underrepresented groups in medicine and science and as defined by the National Institutes of Health ([diversity.nih.gov/about-us/population-underrepresented](https://diversity.nih.gov/about-us/population-underrepresented)).

The scholarship will cover up to 50% of the annual cost of tuition, with a maximum amount of up to \$40,000 to each awardee, and will be disbursed as payments per term (three terms per year) for a maximum of six total terms while a student is enrolled in the two-year program. This award is designed to align with our department's strong commitment to fostering diversity in healthcare providers for the future of academic medicine.

For more information on the Biomedical Imaging Program, please visit: ([gradschool.weill.cornell.edu/programs/biomedical-imaging](https://gradschool.weill.cornell.edu/programs/biomedical-imaging))

The application deadline is April 30, 2024.
